

Information Security Policy

Merino Consulting Services ensures that all the information of internal and external customers, stakeholders and sub-contractors shall be protected in a manner that is considered reasonable and appropriate, during the entire life cycle of information flow. Management is committed on well-defined objectives for strategy and security.

Information Security Policy focuses on three main objectives - Confidentiality, Integrity, and Availability. Merino Consulting Services serve to protect the Confidentiality, Integrity, and Availability of the Information Resources maintained within the organization by using managerial, administrative, physical, and technical controls.
